

## **Annual Backflow Inspection Requirements**

- Annual backflow valve inspections for properties currently on Diamond Meadows water system will be performed between the months of June 1st through September 1st.
- Property owners are required to have the backflow valve accessible during this time for inspection – this means easily identifiable and uncovered from debris and or soil.
- After completed inspections – it is the property owner's responsibility to cover/insulate backflow as they see fit for the coming winter months.
